

# Labour Force Survey (LFS) – Poster

Annamalia Chidambaram  
Kitchener , Canada

## INTRODUCTION

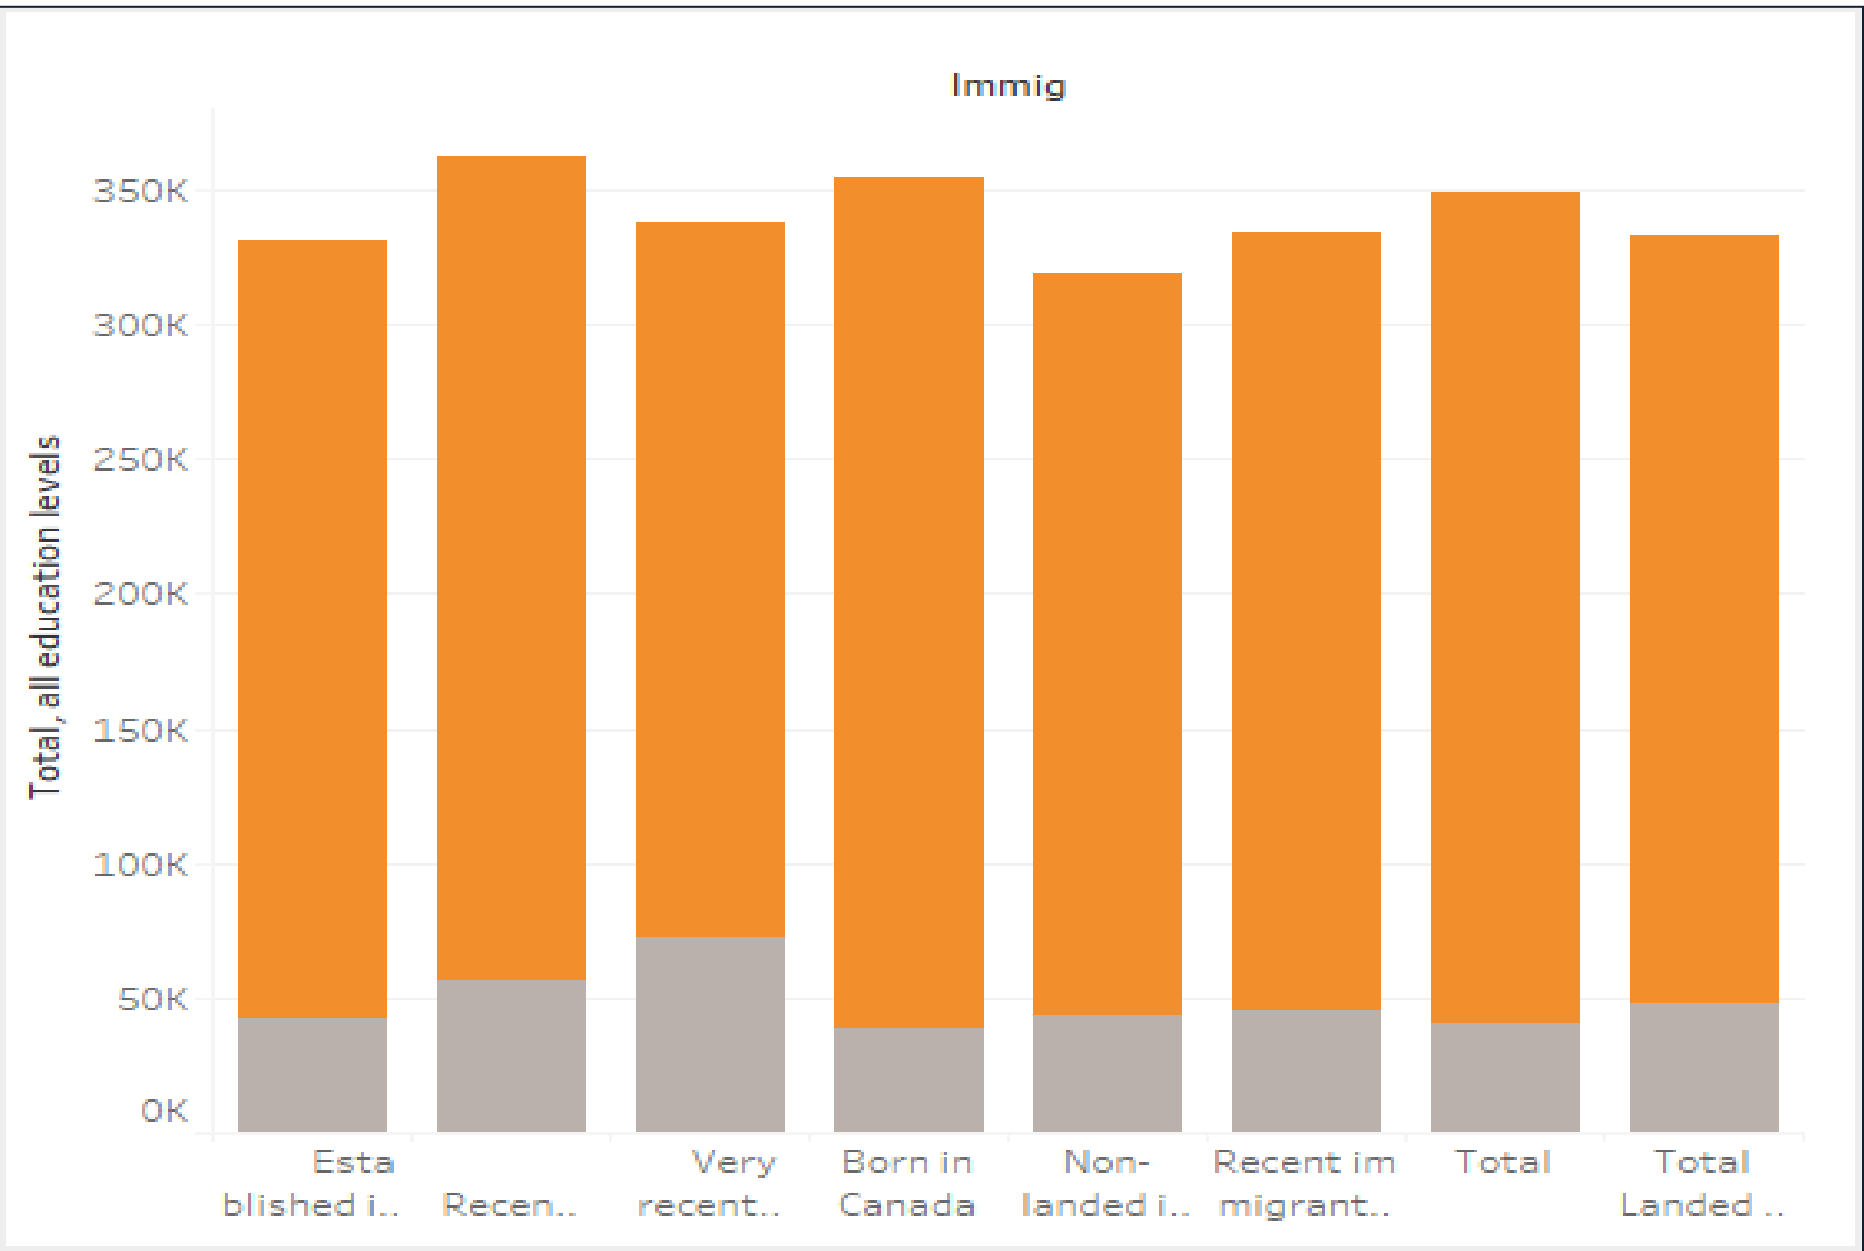

Immigration plays an important role in Canada's Economy.

Immigration will continue to play a significant role in the demographic expansion of the future, according to recent population projections. This analysis include Immigration data and Education levels of labor force Estimates. Importantly labor force Estimates helps in Monitoring labor Market which plays an important role in Canada's Economy.

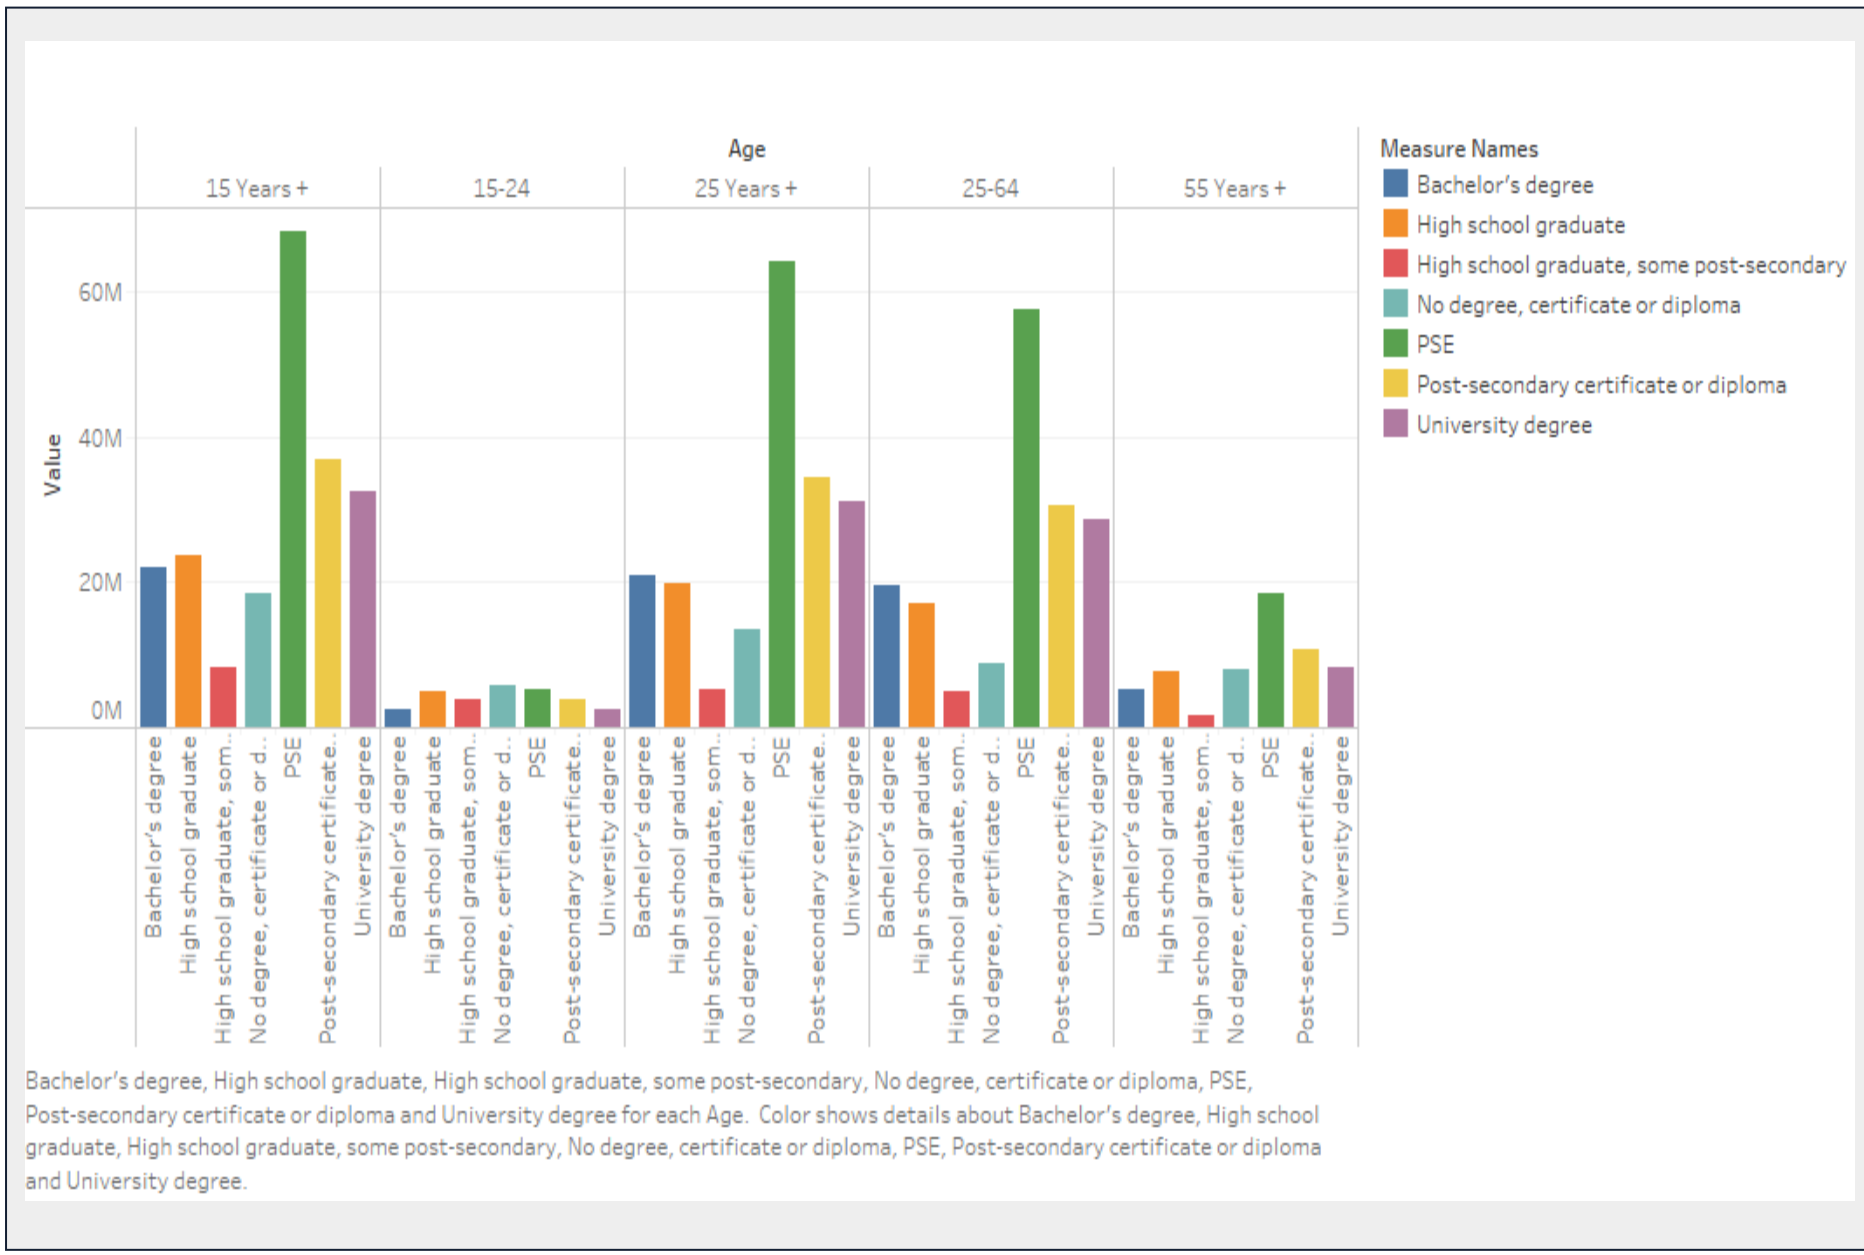

## AIM

The aim is to use labor force Estimates by Immigration to identify relationships, trends and facts of immigration which is important for Canadas Economy

## METHOD

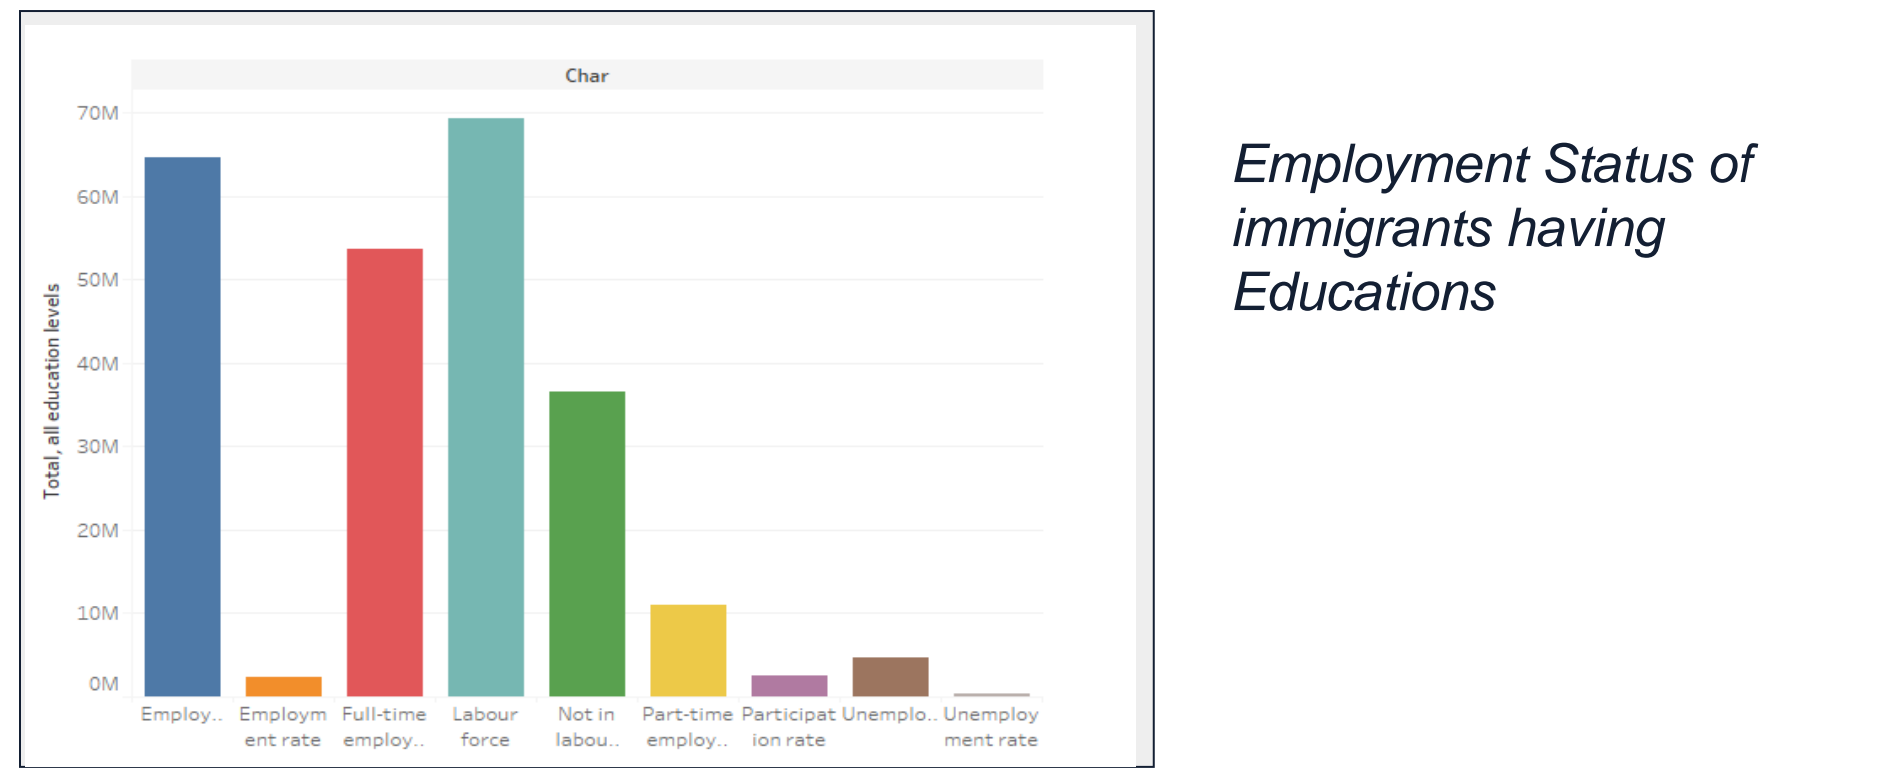

Employed and Unemployed Immigrants having Educations

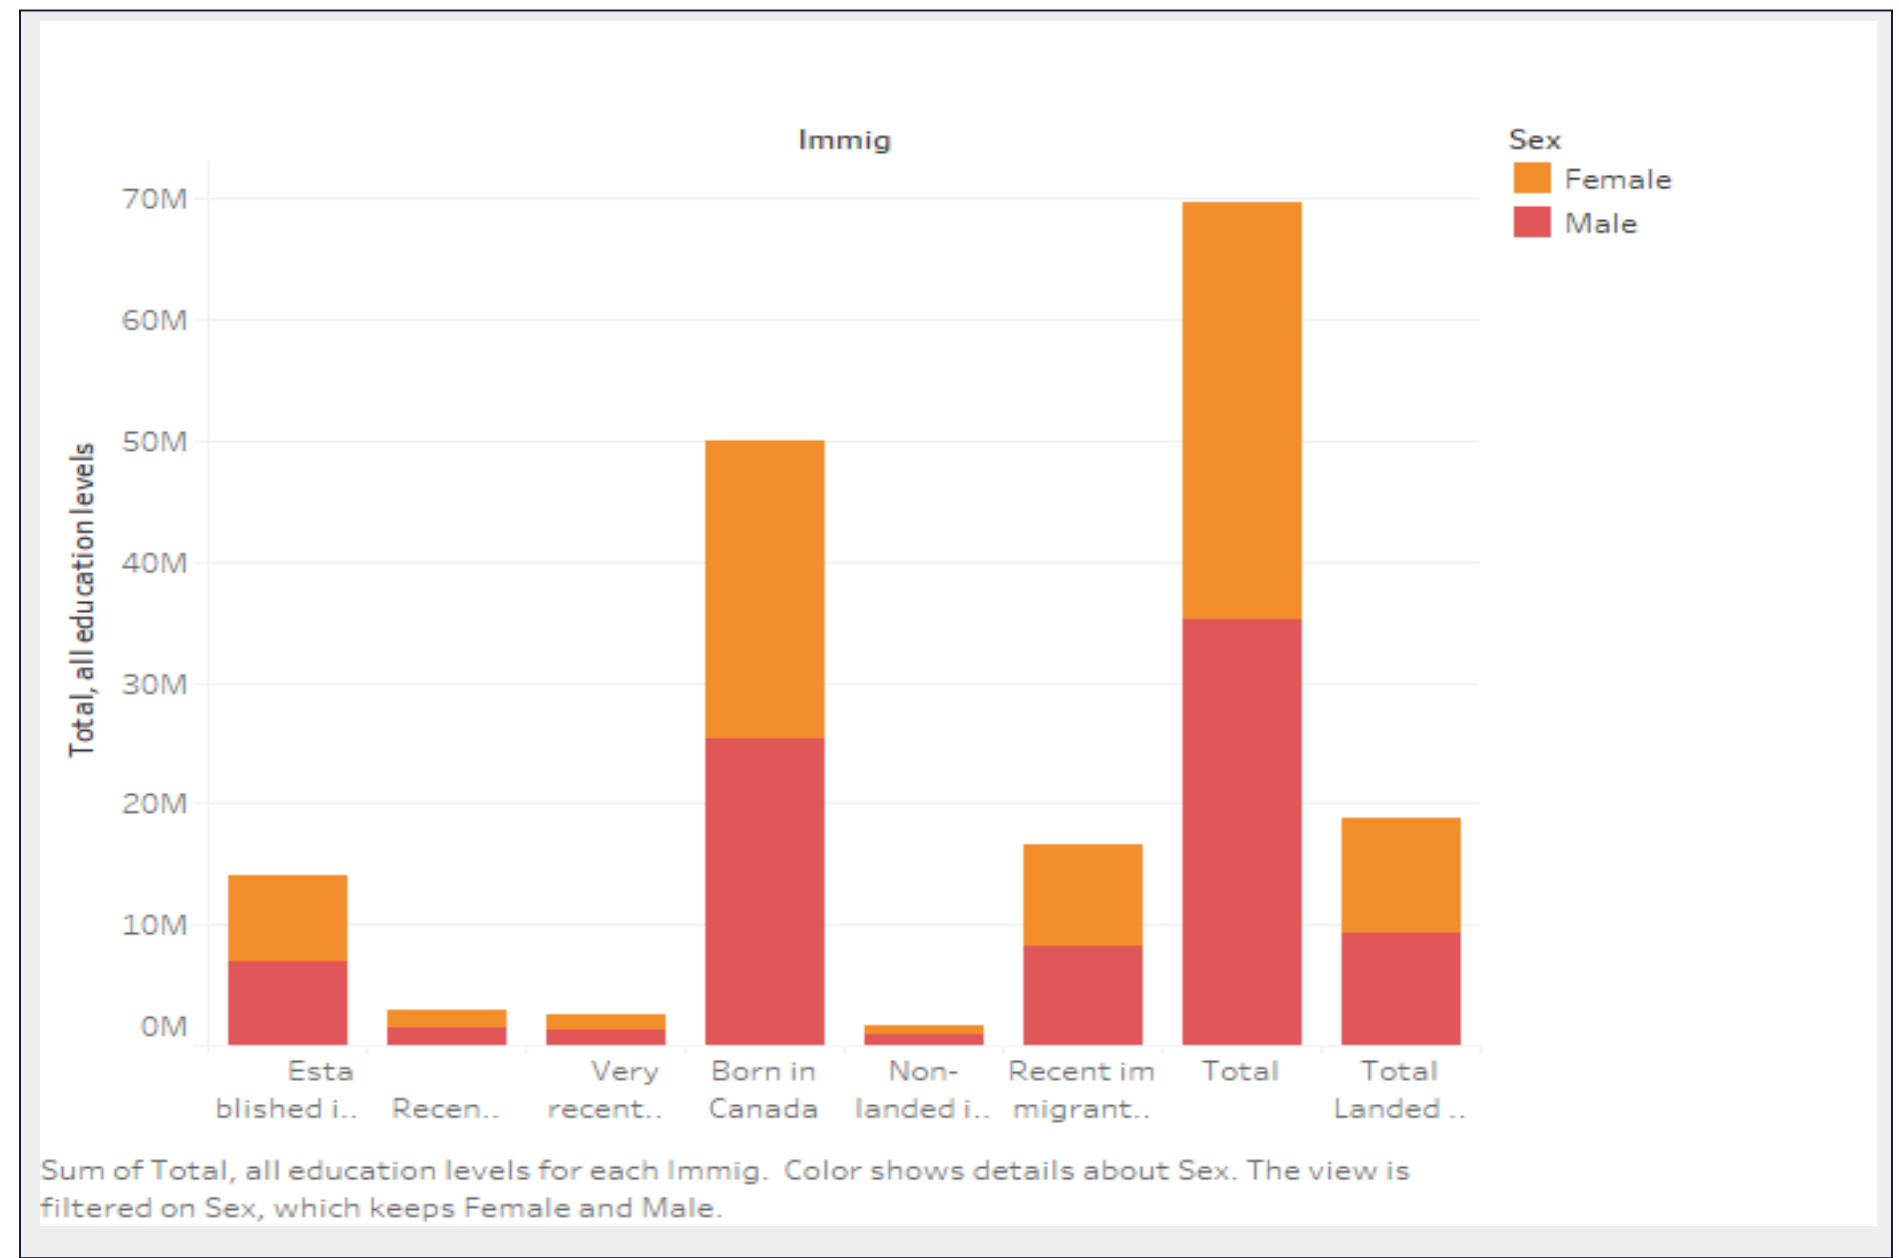

Following a sluggish recovery, employment among core working-age immigrants (25 to 54) climbed significantly in 2011.

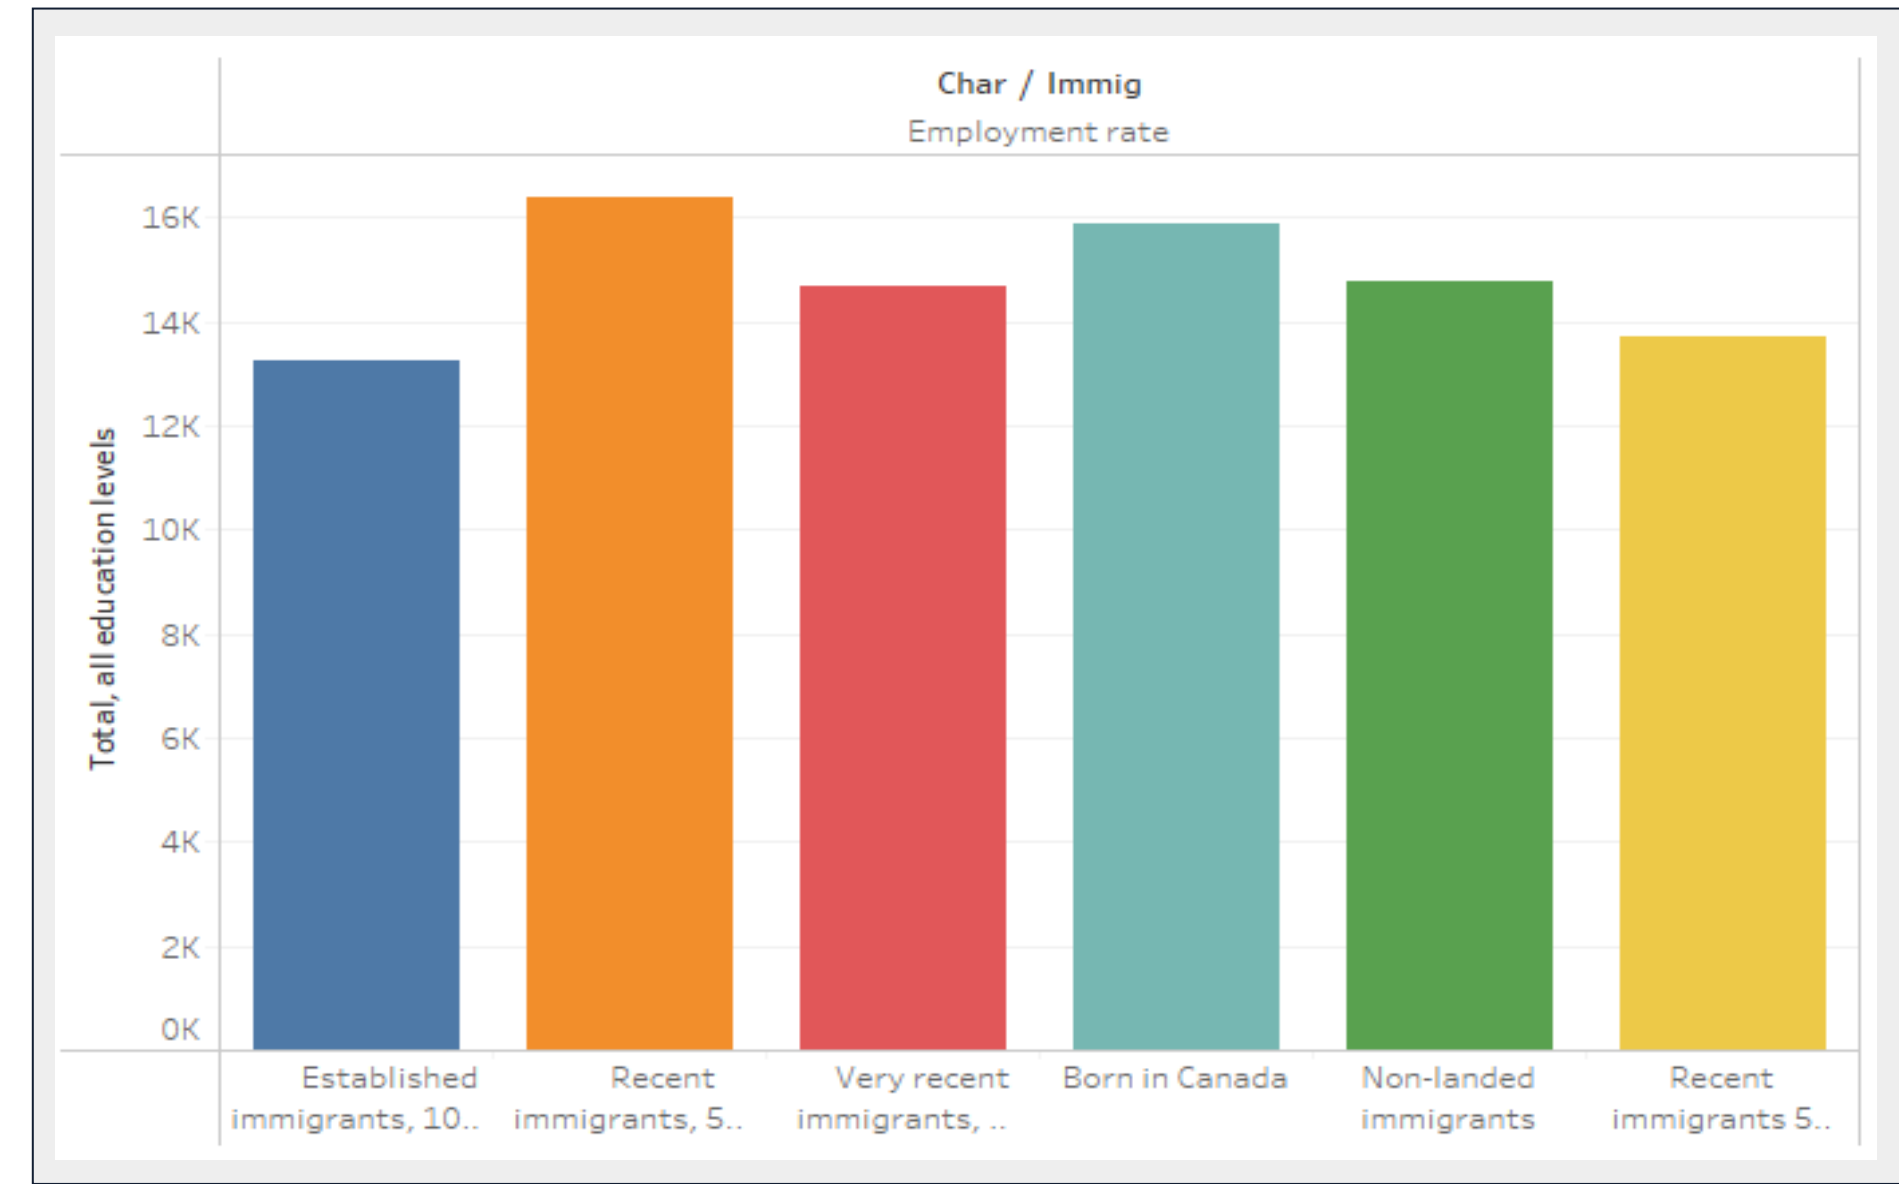

## RESULTS

From 2008 to 2011, most of the increase in immigrant employment was in health care and social assistance, Canada's second-largest industry, as well as information, cultural, and leisure services.

Male Female Ratio of Immigrants according to the Total Education Level

The Immigrants who were immigrated in the time period of 5 to 10yr are much high then other immigrants.

## Future Works

Earnings are seen as a key component of labor-market outcomes. The word 'labour market outcomes' in the future report refers to rates of employment and unemployment, as well as a brief study of incomes. New prediction can be made for the recently immigrated people for how long they are going to be unemployed and at what rate Canadian government can make opportunities for them to be employed. We can also make a forecasting service and monitoring service to monitor employment rate and able to decrease unemployed peoples.

## CONCLUSIONS

Starting in 2031, more than 80% of this growth is projected to come from immigration, compared to about 67% currently. 1 However, many source countries of immigrants to Canada will be facing similar trends of population aging, stemming from their own demographic transition. And more nations with older populations and falling birth rates will be competing with Canada for young, skilled and mobile workers.
